Introduction

The following notes are based on British Standards:

BS 5605:1990. Recommendations for citing and referencing published material. 2nd ed. B.S.I. (Dorset House Library - 028.7 BRI)

When writing a piece of work you will need to refer in your text to material written or produced by others. This procedure is called citing or quoting references. Consistency and accuracy are important to enable readers to identify and locate the material to which you have referred. The same set of rules should be followed every time you cite a reference. The system used in Bournemouth University is the Harvard System. However, if you are providing work for scholarly journals you should check whether they use alternative methods.

References need to be cited in two different places. Firstly at the point at which a document is referred to in the text of the work; secondly in a list at the end of the work - the bibliography.
Citation in the Text

The Harvard System (Author-date method)

All statements, opinions, conclusions etc. taken from another writer's work should be cited, whether the work is directly quoted, paraphrased or summarised. In the Harvard System cited publications are referred to in the text by giving the author's surname and the year of publication in one of the forms shown below.

If details of particular parts of a document are required, e.g. page numbers, they should be given after the year within the parentheses.

1.1 If the author's name occurs naturally in the sentence the year is given in parentheses:-

   e.g. In a popular study Harvey (1992, p.556) argued that ...

1.2 If, however, the name does not occur naturally in the sentence, both name and year are given in parentheses:-

   e.g. More recent studies (Bartlett 1996; James 1998) show that ...

1.3 When an author has published more than one cited document in the same year, these are distinguished by adding lower case letters (a,b,c, etc.) after the year and within the parentheses:-

   e.g. Johnson (1994a) discussed the subject ...

1.4 If there are two authors, the surnames of both should be given:-

   e.g. Matthews and Jones (1993) have proposed that...

1.5 If there are more than two authors the surname of the first author only should be given, followed by et al :-

   e.g. Wilson et al. (1997) conclude that...

1.6 If there is no originator then "Anon" should be used:-

   e.g. A recent article (Anon 1993) stated that...

However, if it is a reference to newspapers where no author is given the name of the paper can be used in place of author or Anon whichever seems most helpful. You will need to use the same style in the reference list so the name of the newspaper may be more helpful.

   e.g. The Times (1996) stated that....

1.7 If you refer to a source quoted in another work you cite both in the text:-

   e.g. A study by Smith (1960 cited Jones 1994 p.24) showed that...

   (You need to list the work you have used, i.e. Jones, in the main bibliography.)
1.8 Quotations:-

A short quotation of less than a line may be included in the body of
the text in quotation marks but if it is longer start a new line and
indent it. Include the page number if desired.

e.g.: .... so "good practices must be taught" (Smith 1996, p.15)
and we should...

or: Theory rises out of practice, and once validated, returns
to direct or explain the practice. (Stevens 1997, p.92).

1.9 Diagrams:-

Diagrams should be referenced as though they were a quotation
with the author and date given alongside and full details in the list
of references.

Additional notes about citations:

1.0 Personal communications:-

They do not provide recoverable data and so are not included in the
reference list. Cite personal communications in the text only. Give
initials as well as the surname of the communicator and provide as
exact a date as possible.

e.g. Many designers do not understand the needs of disabled people
according to J. O. Reiss (personal communication, April 18, 1997).

The bibliography at the end of a piece of work

The term bibliography describes references to cited documents given in a list at the end
of the text. These are usually described as bibliographic references.

(In some departments the bibliography is called a references list and there is a separate
bibliography of works that have been read but not cited.)

In the Harvard System, the references are listed in alphabetical order of authors'
names. If you have cited more than one item by a specific author they should be listed
chronologically (earliest first), and by letter (1993a, 1993b) if more than one item has
been published during a specific year.

Whenever possible, elements of a bibliographical reference should be taken from the title
page of the publication.

Each reference should use the elements and punctuation given in the following examples
for the different types of published work you may have cited.

Citing unpublished material

See BS 6371:1983. Citation of unpublished documents. B.S.I.

(Dorset, Weymouth and Bournemouth House Libraries 028.7 BRI)
Electronic material - following the Harvard System.

No standard method for citing electronic sources of information has yet been agreed upon. The recommendations in this document follow the practices most likely to be adopted and are intended as guidance for those needing to cite electronic sources of information now. Those intending to use such citations in papers submitted to scholarly journals should check whether an alternative method is used by that journal.
