香港綠化屋頂的發展
许俊民 博士 工程師
Contents 内容

• Introduction 引言
• Potential benefits 潛在的好處
• Green roof examples 屋頂綠化的例子
• Vertical greening examples 垂直綠化的例子
• Major considerations 主要考慮因素
• Development trends 發展趨勢
• Conclusions 結論
Introduction 引言

- **Green Roofs**: roofs bearing vegetation – FLL*
  - “Living vegetation installed on the roofs”
  - “Vegetated roof” 植被屋頂
- **Green Roof System** – Definition 屋頂綠化系統
  - “A roof area of plantings/landscape installed above a waterproofed substrate at any building level that is separated from the ground beneath it by a man-made structure.” – *NRCA Green Roof System Manual 2007*
  生態屋頂，活生屋頂
- **Other green roof terms**: Eco-roof, Living roof

* FLL = Research Society for Landscape Development and Landscape Design (Forschungsgesellschaft Landschaftsentwicklung Land-schaftsbau e.V.) (www.fll.de)

Typical structure of extensive green roof

粗放型屋頂綠化的典型結構

- Vegetation
- Growing medium
- Filter membrane
- Drainage layer
- Waterproofing membrane
- Support panel
- Thermal insulation
- Vapour control layer
- Structural support
Examples of green roofs in the world 世界上綠化屋頂的例子

Solar Campus Jülich, Germany (11 Jul 2001)  
IBN-DLO Wageningen, the Netherlands (2 Jul 2001)

Putrajava Int. Conven. Centre, Malaysia (30 Jun 2006)  
Beitou Taipei Library, Taiwan (6 Aug 2007)

(Photos taken by Dr Sam C M Hui)
Introduction 引言

- **Built-in green roofs** 内置绿化屋頂
  - Installed in layers for the roof surface
  - More complex and permanent
  - Time needed for on-site installation & growing
  - Excess weight (180 to 450 kg/m²)
  - Complexity of maintenance

- **Modular green roofs** 模块化绿化屋頂
  - Prefabricated off-site, pre-grown, with modular design
  - Sub-divided into standard interchangeable parts
Modular green roofs

Another type of “green roof” in Hong Kong?!
Building + **Green Roof**, but done in a wrong way.
Introduction 引言

- Hong Kong Special Administrative Region (HKSAR) 香港特別行政區
  - Land area 土地面積: 1,104 km$^2$
  - Population 人口: 7.18 millions
  - Population density 人口密度: 6,504 persons/ km$^2$
  - High urban density to meet population growth 高建築密度應付人口增加
  - Urban heat island and lack of greenery space 城市熱島和缺乏綠化空間的問題日益嚴重
Introduction 引言

• Promote green roofs and vertical greening to achieve urban sustainability 推展綠化屋頂和垂直綠化，實現城市可持續性

• Common types of roof greening: podium gardens and sky gardens 屋頂綠化的常見類型：平台花園和空中花園

• New greening techniques: 新的綠化技術
  • Extensive green roofs 粗放型屋頂綠化
  • Living walls & green facades 活生牆和綠化牆
A residential podium garden 住宅平台花園

Introduction 引言

- Our green roof research 我們的屋頂綠化研究*
  - Started in 2002 從2002年開始
    - 1. Assess the potential & impacts of urban greening 評估城市綠化的潛在影響
    - 2. Develop practical guidelines & information 制定切實可行的指引及信息
    - 3. Evaluate building greening policy 評估建築綠化政策
    - 4. Promote education & technology development 促進教育和科技發展

Potential benefits

• Green roofs & vertical greening 綠化屋頂和垂直綠化
  • Building integrated vegetation 建築綜合性植被
  • Urban cityscape 城市景觀
  • Green infrastructure 綠色基礎建設
• Possible benefits: 可能的好處
  • 1. Environmental 環境的
  • 2. Economic 經濟的
  • 3. Social 社會的
Potential benefits 潛在的好處

• 1. Environmental benefits: 環境的好處
  • - Mitigate urban heat island 緩解城市熱島
  • - Improve air quality 改善空氣質量
  • - Stormwater management 改善城市雨水管理
  • - Create natural habitat 建立自然棲息地
  • - Increase biodiversity 增加生物多樣性
  • - Insulate and absorb sound 隔音和吸音
  • - Possible urban farming 可作都市農業
Urban heat island in Hong Kong 香港城市熱島

(Source: SCMP and Hong Kong Observatory)
Rainstorm flooding problems in Hong Kong (2008)
在香港的暴雨水浸問題

(Source: www.accuweather.com)
Potential benefits

2. Economic benefits: 經濟的好處
   - Improve roof durability 提高屋頂的耐久性
   - Increase roof material lifetime 增加屋頂的壽命
   - Reduce building cooling load and energy costs 降低建築冷負荷和能源成本
   - Provide open space & increase property value 提供開放空間，可增加物業價值
   - Green building credit points & image 綠色建築評估得分和形象
Evapo-transpiration

Thermal mass

Roof slab

Indoor

Outdoor

Shading

Insulating property
Potential benefits 潛在的好處

3. Social benefits: 社會的好處
   - Aesthetic for city space 美化市容的空間
   - Provide community green space & gardens for sports & leisure 提供社區綠地和花園，可作運動和休閒
   - Community participation 提供社區的積極參與
   - Provide education opportunities 提供教育機會
   - Enhance local employment 加強地方就業
Urban farming & education

Potential benefits 潛在的好處

- Green Building Assessment 綠色建築評估
  - Such as BEAM Plus
  - They are becoming more and more popular and important
  - In fact, greening technology has significant implications to the assessment results
  - Green roofs can gain credit points in the green building assessment or rating schemes
## BEAM Plus credit points of green roof systems

Vertical greening examples
垂直綠化的例子

• Common reasons for vertical greening 採用垂直綠化的常見原因：
  • Aesthetic (how it looks) 美學(它的外觀)
  • Cognitive (meaning) 識知(意義)
  • Experiential (use) 體驗(使用)
  • Planning and financial gains ($) 規劃和財務收益
  • Pollution absorption (air) 吸收污染(空氣)
  • Ecology (habitats) 生態(棲息地)
Vertical greening examples
垂直綠化的例子

- Application methods of vertical greening 垂直綠化的應用方法：
  - 1. Building façades or outdoor vertical surfaces 建築外牆或戶外垂直表面
  - 2. Interior walls or indoor vertical surfaces 室內牆壁或室內垂直表面
  - 3. Noise barriers (e.g. along the roads) 隔音屏障（例如在道路兩旁）
  - 4. Slopes 斜坡
An example of vertical greening 垂直綠化的一個例子

Major considerations
主要考慮因素

- Key factors for planning 主要規劃因素
  - Structural loading 結構負荷
  - Accessibility 能否容易到達
  - Waterproofing 屋面防漏水
  - Drainage 排水渠務
  - Maintenance 維護保養

- Other design considerations 其他設計考慮
  - Selection of plants (e.g. hardy plants) 選擇植物
  - Stakeholders’ involvement & support 參與支持
Major considerations
主要考慮因素

- **Climatic factors 氣候因素**
  - **Typhoons** 變風：強風會吹走植被土壤
  - **Heavy rainfalls**: hold and drain the rain water without creating pools of stagnant standing water 大雨：不積水池的雨水排水
  - **High temperature**: affect some plant species 高溫：某些植物物種的影響
  - **Strong sunlight**: solar and UV radiation 強烈的陽光：太陽能和紫外線輻射
Major considerations

- High-rise buildings: very limited roof spaces
  高層建築：屋頂的空間非常有限
  - Better to apply green roofs to medium- or low-rise buildings/structures or podium roofs
    更好地適用於中或低矮建築物/構築物或平台屋頂綠化
    - Podium/sky gardens
  - Structural loading 結構荷載
    - Determine validity and cost 確定有效性和成本
    - For existing buildings 對於現有建築物
      - Light-weight greening systems 輕質綠化系統
Green roof on a low-rise building 在低層建築的屋頂綠化

(Source: Hongkong Electric Co., Ltd.)
Infrared photo for assessing thermal effects

Typical hardy plants (sedums) used for green roofs

評估熱效應的紅外照片

用於綠化屋頂的典型頑強的景天植物
Major considerations
主要考慮因素

• Costs and commitments 成本和承諾
  • Capital cost (direct & indirect costs) 資本成本(直接和間接成本)
  • Recurrent maintenance costs 經常維修保養費用
  • Life-cycle costs 生命週期成本
  • Risk of failure costs 失敗的風險成本
  • Maintenance commitments 維護承諾
  • Ownership 擁有權
Development trends 發展趨勢

- Sustainable technologies 可持續發展技術
  - Rainwater harvesting 雨水收集
  - Renewable energy (e.g. solar photovoltaic & wind) 可再生能源(如太陽能光伏和風能)
  - Composting (for producing fertilizer) 堆肥(用於生產肥料)
- Farming & food production 農業和食品生產
  - Agricultural green roofs 農業屋頂綠化
  - Edible living walls 可食用的活生牆
Integration of green roof, rainwater recycling and renewable energy

屋頂綠化，雨水回收利用和可再生能源的集成
Integration of green roof and solar energy systems

(Photos taken by Dr Sam C M Hui)
Conclusions 結論

• Green roofs and vertical greening are developing fast in Hong Kong 屋頂綠化和垂直綠化在香港正快速發展
• New techniques are applied to urban greening 新技術應用到城市綠化
• More efforts are needed to determine suitable technologies and policy for promoting them 需要更多的努力，以確定合適的技術和政策，以促進城市綠化
THANK YOU 謝謝 !!
